

Fugalite Color **kerakoll**

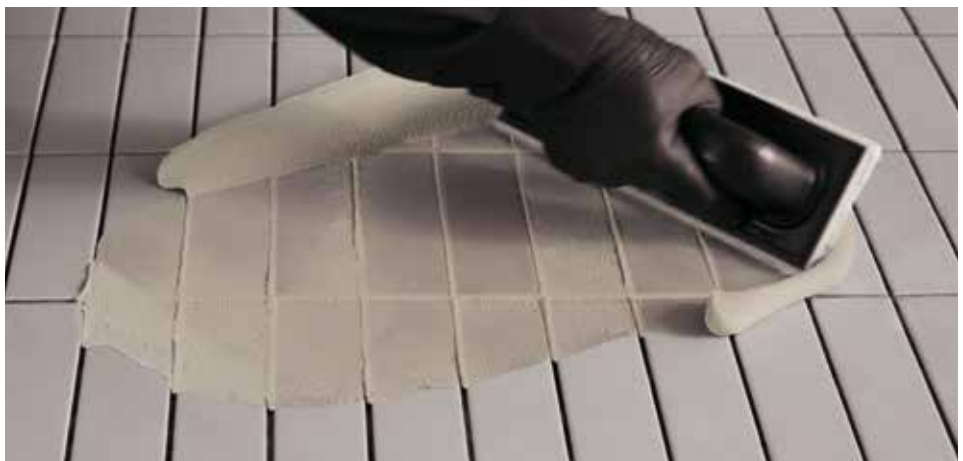

Waterproof resin
for the grouting and
fixing of ceramic tiles,
mosaics and natural
stone, available in 50
contemporary colours.

Fugalite Color

Fugalite Color is a next-generation resin that combines the performance of epoxy grout with unparalleled ease of use. Waterproof and designed for grouting and fixing tiles, mosaics and natural stone, it offers chemical resistance and long-lasting colour. Available in 50 contemporary shades to suit every space.

- Multipurpose - suitable for all tile types and applications
- Stain-proof - easy to clean
- Waterproof - ideal for wet environments
- UV resistant - long lasting colour intensity
- Superior workability - easy to mix, apply and clean
- Certified for food hygiene areas
- Prevents the growth of bacteria and mould (ISO 846 2019: Method A/B/C)

Joints - walls and floor Fugalite Color KK 55
Sealant - washbasin counter Silicone Color KK 107

Unique performance for a seamless finish and long-lasting protection.

→ **One solution for grout and adhesive applications**

Fugalite Color is both a resin grout and an adhesive for use with ceramic tiles, mosaics and natural stone. Its liquid ceramic formulation combines mechanical and chemical resistance for long-lasting durability. Create a seamless finish by matching one of the 50 shades to the surface, in line with contemporary design trends.

→ **Easy to mix, apply and clean, offering superior workability**

Kerakoll researchers have developed a high-performance resin grout that offers the waterproofing and stain resistance of epoxy grout, combined with exceptional workability. Easier to mix, apply and clean than traditional epoxy grouts, it helps reduce errors on site and ensures a faster, cleaner finish.

→ **Certified durability, whatever the environment**

Fugalite Color offers long-lasting protection against water, stains, mould and bacteria. Its dense, non-absorbent surface resists abrasion and chemical attack, making it ideal for areas exposed to heavy use, damp conditions or regular cleaning. Colour durability is tested by CATAS and certified to ASTM G155 for resistance to ageing caused by sunlight.
